Proposal Recap

PROJECT SCOPE

- Develop a structured assortment system using AI-assisted analysis
- Identify assortment gaps and category opportunities
- Generate a proposed product concept aligned with trend research

DATA SOURCES

- Current product listings from the Miu Miu website
- Luxury retailer platforms
- Runway collection references
- Industry trend and merchandising reports

KEY DELIVERABLES

Research

- Brand overview, positioning, and target consumer
- Category standards and brand assortment
- Trend research influencing future assortment development

Data

- SKU counts
- Category distribution analysis
- Gap and overlap identification
- Structured assortment planning ideas

Visual outputs

- 6-8 AI-generated product concept visuals
- Proposed assortment structure
- Category expansion visuals

Objectives & Context

OBJECTIVES

- Create an assortment system for Miu Miu
- Analyze current category distribution to identify potential assortment gaps
- Integrate trend research into proposed product opportunities
- Generate AI visuals to represent proposed assortment concepts

INDUSTRY RELEVANCE

- Assortment planning is one of the key processes in fashion buying and merchandising
- AI tools are increasingly starting to be incorporated into fashion through product data and supporting product decisions
- This project helps demonstrate how AI can help support assortment development in retail

CLASS RELEVANCE

- Prompt engineering to generate structured merchandising outputs
- Reflects the real-world application of AI in fashion, specifically in merchandising
- Demonstrates use of AI for visual generation and data organization

A woman with dark hair is seated in a restaurant with red walls and patterned wallpaper. She is wearing a dark, patterned jacket over a white shirt. She is holding a red, textured Miu Miu bag with the brand name visible. The background shows a blurred view of the restaurant interior with tables and chairs.

BRAND IDENTITY, CONSUMER INSIGHTS, & TREND ANALYSIS

MEET MIU MIU

BRAND OVERVIEW

Miu Miu is a luxury fashion brand owned by the Prada Group that was founded in 1993 by Miuccia Prada, a well-known Italian fashion designer who is Prada's current creative director. Miu Miu is known for its youthful rebellion, femininity, and experimentation.

POSITIONING

- Positioned as an experimental, high-end, and avant-garde luxury fashion brand
- Offers more of a playful alternative to its sister brand, Prada
- Experienced massive growth over recent years, grew out of niche status

CORE IDENTITY

- Playful, rebellious, and unrestrained alter ego to Prada
- Challenges the traditional fashion norms
- Unconventional expression of femininity

PRODUCT & DESIGN DNA

- Mix of classic and quirky silhouettes, such as tailored silhouettes with whimsical styles and unconventional details
- Experimental and eccentric details such as bows, embroidery, and unexpected color combinations
- Classic preppy pieces often have an unexpected twist, like raw finishes, asymmetrical cuts, or layered styling

MEET THE IT GIRL

BRAND ARCHETYPE

The Miu Miu ‘It Girl’ represents a persona that embodies the essence of the brand. The current identity reflects a rebellious younger sister aesthetic that is innocent yet mischievous. Playful yet effortlessly stylish.

PERSONALITY TRAITS

- Embraces individuality
- Balances innocence with boldness
- Confident but playful
- Expressive femininity

STYLE CHARACTERISTICS

- Unexpected styling combinations
- Mix of nostalgic and modern elements
- Slightly unconventional styling
- Playful and contrasting styles

CULTURAL IDENTITY

- Represents fluid identity across age, gender, and culture
- Embraces diversity in representation
- Encourages consumers to reject conventional societal norms
- Appeals to individuals seeking unique forms of self-expression

“THE MIU MIU WOMEN ARE PLURAL: THEY ARE A COMMUNITY, A MULTITUDE OF WOMEN WHO RECOGNIZE THEMSELVES IN THEIR OWN INDIVIDUALITY.” - BENEDETTA PETRUZZO

TREND RESEARCH

TREND DRIVER – STRATEGIC JOY

- Consumers are increasingly drawn to playful and expressive design as a response to stress and uncertainty happening in the real world
- Joy-driven creativity is shaping product aesthetics and encouraging bold and imaginative styling
- Brands are using playful elements to create emotional connection and engagement with consumers

MATERIAL DIRECTION

- Fur trims and tactile textures continue to gain momentum across luxury collections
- Fur details continue to be featured in recent runways showing the trend's continuous growth
- 'It' status confirmed for the year ahead
- Highlighted for its tactile comfort, a stylish and elevated element for any outfit

RETRO NOSTALGIC REVIVAL

- Return of vintage-inspired silhouettes
- Revival of classic outerwear shapes
- Influence of youthful nostalgia and retro styling

VINTAGE-INSPIRED STATEMENTS

- Increasing growth of bold, vintage-inspired jewelry
- Emphasis on statement necklaces and decorative elements
- Styling using layered accessories

PLAYFUL SIMPLICITY

- Minimal designs with playful details
- Use of asymmetry, surreal elements, and unexpected shapes
- Emphasis on visual contrast and expressive styling

ASSORTMENT STANDARDS

CATEGORY STANDARDS

- Brands maintain structured assortments across different core categories like apparel, bags, footwear, and accessories
- A balance in categories ensures a mix of seasonal, statement, and core items
- Accessories and handbags normally represent high SKU diversity within luxury assortments

CUSTOMER USE CASES

- Assortments are created to support multiple occasions such as everyday wear, workwear, travel, special events etc.
- Product assortments are developed to meet the functional and emotional needs of consumers
- The more versatile the use of products is, the more relevant and the sales performance becomes stronger

ASSORTMENT NORMS

- Strong assortment planning prevents uncontrolled product inventory and reduces repetitive product offerings
- A balanced inventory helps minimize stockouts and excess inventory
- Strategic and effective assortment management can improve overall customer satisfaction and help operations move more smoothly
- Accessories typically make up 20% of the overall assortment for luxury brands

LOEWE VS MIU MIU

WHO'S LOEWE?

- Spanish luxury fashion brand (1846)
- Craftsmanship, artisanal techniques, quiet luxury
- Owned by LVMH
- Direct Miu Miu competitor
- Often swaps the number 1 spot as the world's hottest fashion brand (*Lyst Index*)

KEY COMPARISONS

- Loewe offers more Ready-to-Wear variety compared to Miu Miu
- Both brands share strong accessory categories
- Loewe's products offer more versatility as they have more variety and a balanced assortment

A woman with short dark hair and bangs is sitting in the driver's seat of a vintage car. She is looking out the window at a city at night, with blurred lights visible. She is wearing a dark, patterned dress and has a black handbag with a decorative clasp on her lap. The car's interior is visible, including the dashboard and steering wheel. The overall mood is nostalgic and elegant.

IMPLEMENTATION & METHODS

DATA COLLECTION

- SKU data was collected from the Miu Miu website
- Category totals were counted, recorded, and organized into tables
- Microsoft Excel was used to calculate SKU totals and percentages
- Trends were found through WGSN

AI USE

- Analyzed category balance and identified assortment gaps
- Suggested percentage adjustments
- Conducted gap analysis
- Generated product visuals aligned with trend research and brand identity
- Generated a balanced assortment plan
- Created structured tables to organize assortment data

TYPE OF PROMPTING USED

- Direct and task prompting, use of action words (Analyze....Generate....) to analyze SKU distribution and identify assortment gaps
- Negative prompting (ensure an academic tone, avoid XYZ, do not include subjective statements)
- Reverse prompting was used during image generation

PROJECT REFLECTION

AI STRENGTHS

- Successfully identified assortment gap and category imbalances
- Generated relevant insights in responses without subjective information
- AI-generated visuals
- AI product suggestions aligned with trend research
- Offered realistic percentage changes to balance assortment

CHALLENGES

- Managing SKU data requires strategies and careful organization to ensure accurate category counts
- Determining which AI outputs are aligned with Miu Miu's brand identity
- Maintaining visual consistency across products

SOLUTIONS

- Organized Excel tables were used to organize SKU data and ensure correct counts
- Referenced Miu Miu's old collections/products to ensure accurate product outputs
- Personal judgment was used to evaluate AI outputs and select final results
- Revised prompting to refine outputs until ideal inputs were generated

KEY TAKEAWAYS

- AI is effective when identifying assortment gaps and imbalances
- Prompt engineering is crucial to achieving accurate outputs
- Image outputs are more successful with detailed prompts
- The user's own personal judgment is essential when making final decisions
- Outputs require constant monitoring from the user

INDUSTRY IMPACT

- AI-assisted assortment planning can help brands identify gaps and improve category imbalances
- Can help prevent missed opportunities and make inventory planning more efficient

Evaluation & Reflection

LIMITATIONS

- AI sometimes produced products that didn't align with Miu Miu's brand identity
- Produced overly decorative or unrealistic outputs
- AI occasionally generated repetitive designs

AI CHALLENGES

- Prompts required several revisions to produce ideal inputs
- Some visual outputs required multiple revisions
- Maintaining consistent cohesion throughout product visuals
- Repetitive design details in visual outputs
- Some inputs required specific prompts to avoid certain visual output

ETHICS

- User judgment was used for all final decisions
- AI outputs were closely monitored and reviewed to ensure alignment with Miu Miu's brand identity and merchandising goals
- AI suggestions and analysis were evaluated closely to prevent inaccurate information
